Qualitative & Mixed Methods Data Analysis Software

The #1 choice for thousands of researchers around the world

"...there are many psychological phenomena which can only be discovered with a more in-depth qualitative approach. MAXQDA is an excellent tool to discover important aspects of psychological research by offering a structured, easy-to-use platform which helps researchers to organize their data and get fast grip on their results."

METHODOLOGICAL WORKSHOPS

A central part of the mission of the International Convention of Psychological Science (ICPS) is to promote skill-building in integrative psychological science. The program includes workshops by some of the field’s leading experts on various cutting-edge methodologies. There is no additional charge for these workshops; they are included with ICPS registration. For Integrative Science Symposia links with workshops, see page 16.

WELCOME TO THE INAUGURAL ICPS

On behalf of the Steering Committee for the Initiative for Integrative Psychological Science, it is our pleasure to welcome you to Amsterdam for the inaugural International Convention of Psychological Science (ICPS).

Increasingly the excitement in psychological science is in research that spans disciplinary boundaries and that combines different levels of analysis. But seizing the opportunities and meeting the challenges presented by this changing scientific landscape requires a global effort. Several years ago, the Association for Psychological Science (APS) and leaders of pan-European organizations came together to discuss ways to surmount disciplinary and geographical boundaries that can impede scientific progress.

Out of those discussions came initiatives that quickly brought our science together in new ways: the Postdoc Exchange, connecting postdoc programs and strong candidates around the world; and the Global Observer, an e-newsletter highlighting the field’s boundary-crossing research activities. As our efforts grew, several societies – including APS, the European Society of Cognitive Psychology, the European Association of Social Psychology, the European Association for Developmental Psychology, the European Association of Personality Psychology, and the Federation of European Societies of Neuropsychology – cosponsored integrative symposia at meetings across Europe. These events featured some of the world’s most distinguished scientists presenting their research in such areas as neurocognitive development, epigenetics, the future of embodiment, and good data practices and replicability. The success of these programs gave us the confidence to propose a dedicated international meeting focused on integrative science in order to highlight research that is already transcending boundaries, and to encourage the development of new approaches that foster the integrative enterprise.

ICPS is a first-of-its-kind program, organized around a core of Integrative Science Symposia (ISS) featuring distinguished researchers exploring broad questions from a variety of disciplinary perspectives. These symposia are paired with cross-cutting workshops that examine the methodologies behind the research. This innovative structure provides an enriching scientific and collaborative environment for all ICPS attendees regardless of disciplinary background; it holds particular promise for advancing the integrative training of our students.

This convention would not have been possible without the dedicated work of the ICPS Program Committee. Many thanks to co-chairs Daniel P. Cervone (University of Illinois at Chicago, USA) and Arnaud Rey (CNRS & Aix-Marseille University, France) and the members of the committee: Terry K. Au (University of Hong Kong), Michael J. Frank (Brown University, USA), Eva Gilboa-Schechtman (Bar-Ilan University, Israel), and Ellen Hamaker (Utrecht University, The Netherlands). We would also like to thank APS for organizing this meeting and for supporting integrative science more broadly.

Finally, we would like to thank all who are attending this inaugural convention. Your presence here signals a recognition of the importance of crossing disciplinary and geographical boundaries in advancing science and its benefits to society.

Wishing you an enjoyable and productive convention,

On behalf of the ICPS Program Committee, we welcome you to the inaugural International Convention of Psychological Science.

Planning for ICPS was ambitious, yet reality has vastly exceeded expectations. The global psychological science community submitted more than 1,500 ICPS presentation proposals (symposia and posters). Scientists from 66 nations are represented in the proceedings. This overwhelmingly positive response to an inaugural event speaks powerfully to the strength of our discipline.

As you will see in the days ahead, our convention is unique in a number of ways. Two are its Integrative Science Symposia (ISSs) and Workshops. Each of 10 Integrative Science Symposia explores a major scientific topic in a cross-cutting, interdisciplinary manner. Investigators from not only psychology, but also neuroscience, genetics, anthropology, linguistics, and related fields bring diverse methods to bear on shared scientific concerns. ICPS Workshops are conceptually linked to the ISSs. The workshops thus enable attendees to learn cutting-edge research methods that yielded the findings presented in the symposia.

ICPS programming also is highlighted by stellar keynote addresses. Presentations by Stanislas Dehaene, Terrie E. Moffitt, and George Lakoff cap off our three convention days.

These events combine with the extraordinarily strong and diverse scientific advances represented in our many symposia and poster sessions. These efforts by you, our presenters and convention attendees, provide the intellectual energy that powers this inaugural convention and assures its success.

Best wishes for a fruitful and memorable convention.

Pre-conference Teaching Institute
Teaching Integrative Psychological Science

The Teaching Institute is sponsored by the Association for Psychological Science (APS) and the Society for the Teaching of Psychology (STP). The day-long program provides insights into teaching integrative psychological science. The Institute includes a poster session and lunch.

See page 109 for the schedule. Please note that the Teaching Institute requires an additional registration fee.

For posters and full program details, use the ICPS app (search for “ICPS 2015” in the app store) or visit www.icps-2015/program.
GENERAL INFORMATION

ICPS Mobile App
With the free “ICPS 2015” mobile app you can search the full ICPS program to create a personalized itinerary. You can search the program by day, subject area, keyword, and speaker name. The mobile app is available for iPhone, iPad, and Android devices. If you don’t have one of those “smart” devices, a web version is available at www.icps-2015.org/app.

Internet Access
APS is pleased to provide meeting attendees with complimentary WiFi throughout the meeting space of the Beurs van Berlage and NH Grand Hotel Krasnapolsky.

At the Beurs van Berlage: Select the “icps2015” and enter the password “amsterdam.”
At the NH Grand Krasnapolsky: Select “NH Krasnapolsky” (no password needed)

ICPS Poster Sessions
Please refer to the online program (www.icps-2015.org/program) or the “ICPS 2015” mobile app for the details of each poster session, including abstracts and times. ICPS poster sessions are held in the ICPS Exhibit Hall-Grote Zaal at the Beurs van Berlage.

Poster Check
Posters may be stored at no cost in the poster check station located outside of the ICPS Exhibit Hall-Grote Zaal.
Poster check hours are:

Thursday, 12 March

Name Badges
Name badges are required for admission to all meeting rooms, exhibit hall, and social events. Non-transferable name badges will only be issued to persons who have registered for ICPS.

ICPS Program
Attendees receive one ICPS printed program. The full program and list of posters is available online at www.icps-2015.org/program and in the “ICPS 2015” mobile app.

Photography & Video Release
As part of your ICPS registration, APS reserves the right to use professional photographs and video taken during ICPS and the pre-conference Teaching Institute for future marketing purposes.

Methodological Workshops
A central part of the mission of ICPS is to promote skill-building in integrative psychological science. The program includes workshops by some of the field’s leading experts on various cutting-edge methodologies. There is no additional charge for these workshops; they are included with ICPS registration.

INTEGRATIVE SCIENCE SYMPOSIA
and linked methodological workshops

Solutions to our most pressing scientific questions come from cross-cutting efforts in which investigators deploy diverse research methods and attack problems at multiple levels of analysis. ICPS showcases these efforts in thematic Integrative Science Symposia featuring leading investigators from not only psychological science, but also neuroscience, genetics, sociology, economics, anthropology, linguistics, and related fields. Each Integrative Science Symposium is paired with Cutting-Edge Methodological Workshops that provide scientific skill-building opportunities for all conference attendees. The next several pages highlight the ISSs and their link to workshops.

Avoid the wave by going to the cloud

Switch from paper-based research to cloud-based research with Sona Systems participant pool management software for universities.

Sona Systems participant pool management software provides researchers with a cloud-based environment for setting up studies, recruiting participants, managing timeslots, and creating sophisticated reports – eliminating the need for paper-based methods.

Schools who use our software, such as the top 50 in the US, and 1,000 other universities in 25 countries, typically see participation rates increase by 25-50% and no-show rates drop to below 5%. Try a free demonstration today!
