### Cross-Cutting Theme Programs

**Big Data: Understanding Patterns of Human Behavior**
- **9:00 AM - 12:25 PM**
  - Imperial Ballroom B

**Changing Neurobiology With Behavior**
- **1:00 PM - 3:45 PM**
  - Imperial Ballroom B

**Bring the Family Address**
- **6:00 PM - 7:00 PM**
  - Continental Ballroom 4-6

**Saturday Night Reception**
- **7:00 PM - 8:30 PM**
  - East Lounge

### Special Event

**Coffee With Psychological Science**
Start your Saturday with a cup of hot science.
Meet Editor **Eric Eich**, University of British Columbia, Canada; Senior Editors **Ralph Adolphs**, California Institute of Technology, and **Wendy Berry Mendes**, University of California, San Francisco; and statistics tutorial author **Geoff Cumming**, La Trobe University, Australia, to learn about the journal Psychological Science's latest initiatives at this relaxed and informal discussion.

### Invited Talk

**Recruitment and Selection in the Virtual Workplace**
**Tara S. Behrend**, The George Washington University (Industrial/Organizational)

### Poster Session VIII

- **8:30 AM - 9:30 AM**
  - APS Exhibit Hall - Grand Ballroom
  - (Setup 8:15 AM - 8:30 AM)

### Poster Session IX

- **10:00 AM - 11:00 AM**
  - APS Exhibit Hall - Grand Ballroom

### Poster Session X

- **11:30 AM - 12:30 PM**
  - APS Exhibit Hall - Grand Ballroom

### Poster Session XI

- **1:00 PM - 2:00 PM**
  - APS Exhibit Hall - Grand Ballroom

### Poster Session XII

- **2:30 PM - 3:30 PM**
  - APS Exhibit Hall - Grand Ballroom

### Poster Session XIII

- **4:00 PM - 5:00 PM**
  - APS Exhibit Hall - Grand Ballroom

### Invited Talk

**Are Hormones Associated With Youth Externalizing Psychopathology?**
**Jennifer L. Tackett**, University of Houston (Clinical)

0.5 CE Credit available to psychologists (see page 17 of program).

---

**Observer**

Videos - Photos - Reports - Daily Updates

**Convention News Coverage**

www.psychologicalscience.org/observer

For posters and full program details, use the convention app "2014 APS Convention" or visit www.psychologicalscience.org/convention.
### Invited Talk
9:00 AM - 9:25 AM  
**Psychology’s Neglect of Scientific Method**  
*Yosemite Room B*

**Brian D. Haig**, University of Canterbury, New Zealand  
(Methodology)

### Invited Address
9:00 AM - 9:50 AM  
**Under Color of Authority: Terror, Intergroup Violence, and the Law: A Social Dominance Perspective**  
*Golden Gate 4-5*

**James H. Sidanius**, Harvard University  
(Social)

### Invited Address
9:00 AM - 9:50 AM  
**Why a Developmental Perspective Is Essential: Taking the Long, Multi-Wave View on Substance Use Across Adolescence and the Transition to Adulthood**  
*Golden Gate 7*

**John E. Schulenberg**, University of Michigan  
(Developmental)

### Invited Address
9:00 AM - 9:50 AM  
**Both Ends of the Developmental Continuum: Babies With Down Syndrome as a Multidisciplinary Model for Alzheimer’s in Adults**  
*Franciscan Room B*

**Annette D. Karmiloff-Smith**, Birkbeck, University of London, United Kingdom  
(Developmental)

### APS Student Caucus
9:00 AM - 10:20 AM  
**RISE Award Addresses**  
*APS Exhibit Hall - Events Area*

**Chair:**  
**Gal Slonim**, Bar-Ilan University, Israel  
(General)

**Presentations:**  
**Kevin Callender**, Yale University  
**Naomi Fa-Kaji**, Rice University  
**Sophia Green**, Emory University  
**Sonika Ung**, Loma Linda University

### Invited Symposium
9:00 AM - 10:20 AM  
**Multisensory Convergence**  
*Golden Gate 2-3*

**Chair:**  
**Thomas W. James**, Indiana University Bloomington  
(Biological/Neuroscience)

**Presentations:**  
**Jennifer K. Steeves**, York University, Canada  
**R. Joanne Jao**, Indiana University Bloomington

### Invited Symposium
9:00 AM - 10:20 AM  
**Facebook and Well-Being: A Relationship Worth Pondering?**  
*Continental Ballroom 7-8*

**Chair:**  
**Ethan F. Kross**, University of Michigan  
(Personality/Emotion)

**Presentations:**  
**Matthias R. Mehl**, University of Arizona  
**Joanne V. Wood**, University of Waterloo, Canada

### Invited Symposium
9:00 AM - 10:20 AM  
**Breakthroughs in Understanding Simple Decision Making**  
*Yosemite Room A*

**Chair:**  
**Antonio Rangel**, California Institute of Technology  
(Cognitive)

**Presentations:**  
**Marius Usher**, Tel-Aviv University, Israel  
**Scott Brown**, University of Newcastle, Australia  
**Francis Tuerlinckx**, Katholieke Universiteit Leuven, Belgium

### Society for the Teaching of Psychology
9:00 AM - 9:50 AM  
**The Meaning of Money**  
*Franciscan Room C*

**Kathleen D. Vohs**, University of Minnesota
Cross-Cutting Theme Program

Big Data: Understanding Patterns of Human Behavior

9:00 AM - 12:25 PM

Imperial Ballroom B

With rapid advances in technology, how can psychological science exploit the mountains of information stemming from technology, and what can psychological science teach those developing the technology to optimize the human experience? In this wide-ranging program, speakers will describe how they have harnessed technological advances to understand human behavior, and what the promises and pitfalls may be.

9:00 AM - 9:35 AM

Understanding Memory by Building It: Constructing Semantic Memory Using Large-Scale Naturalistic Data

Michael N. Jones,
Indiana University Bloomington

Memory research has a rich history using carefully controlled laboratory experiments. However, semantic memory develops over a lifetime of linguistic and perceptual experience, making it necessary to study semantic acquisition at a human scale. This presentation will evaluate models of semantic learning that are “grown” on large, real-world datasets, demonstrating the importance of scale for human learning.

9:40 AM - 10:15 AM

Using Smartphones to Sense, Assess, and Improve Well-Being

Tanzeem Choudhury,
Cornell University

Mobile and ubiquitous computing research has led to new techniques for cheaply, accurately, and continuously collecting data on human behavior and interactions. In this talk, Choudhury will give an overview of her work on turning sensor-enabled mobile phones into well-being monitors and instruments for administering real-time/real-place interventions.

10:20 AM - 10:55 AM

Data Repurposing and Quasi-Experiments: Answering Critical Translational Questions in Psychopathology

Brian M. D’Onofrio, Indiana University Bloomington

Translational research focuses on the processes through which basic research informs interventions and vice versa, but several roadblocks impede these efforts. This presentation will illustrate how analyzing data collected for other purposes (e.g., government records and insurance claims) using advanced designs can provide insights into the etiology and treatment of psychopathology.

11:00 AM - 11:35 AM

Understanding and Improving Web Search Using Large-Scale Observations and Experiments

Susan T. Dumais, Microsoft Research

The rise of web-based services has made it possible to capture traces of human behavior in situ at a scale and fidelity previously unimaginable. This presentation will describe how large-scale observations and experiments enable us to characterize behavior and improve web search systems, with a focus on individual differences and temporal dynamics.

11:40 AM - 12:15 AM

Towards Large-Scale, Automated Synthesis of the Human fMRI Literature

Tal Yarkoni, The University of Texas at Austin

The explosive growth of the neuroimaging literature has made aggregation of findings increasingly difficult. In this talk, I describe a novel meta-analysis framework for automated synthesis of fMRI findings. I demonstrate how the framework can be used to draw novel inferences about the relationship between neural and cognitive processes.

9:00 AM - 12:25 PM

Poster Session XI

APS Exhibit Hall - Grand Ballroom

### Invited Talk

**9:30 AM - 9:55 AM**

**Union Square 24**

**Behavioral Science as a Tool for Change: Field Experiments at Google**

Jennifer Kurkoski, People & Innovation Lab, Google  
(Industrial/Organizational)

**Invited Talk**

**10:00 AM - 10:25 AM**

**Union Square 23**

**Menstrual Cycles and Mate Preferences: A Meta-Analytic Investigation of Research Artifacts**

Wendy Wood, University of Southern California  
(General)

### Invited Talk

**9:30 AM - 9:55 AM**

**Yosemite Room B**

**Exploring Big Data: Examples of Statistical Learning Methods**

Gitta H. Lubke, University of Notre Dame and Vrije Universiteit Amsterdam, The Netherlands  
(Methodology)

### Invited Talk

**10:00 AM - 10:25 AM**

**Yosemite Room B**

**Psychoinformatics: New Horizons at the Interface of the Psychological and Computing Sciences**

Tal Yarkoni, The University of Texas at Austin  
(Methodology)

### Invited Symposium

**9:30 AM - 10:50 AM**

**Continental Ballroom 1-2**

**Genes, Brain, and Environment: Biological Pathways to Psychopathology**

Chair: Ryan Bogdan, Washington University in St. Louis  
(Clinical)

**Presentations:**

- **Francesca Filbey,** The University of Texas at Dallas  
- **Nim Tottenham,** University of California, Los Angeles  
- **Luke W. Hyde,** University of Michigan

Discussant: **Ian H. Gotlib,** Stanford University

1.5 CE Credits available to psychologists (see page 17 of program).

### Invited Talk

**10:00 AM - 10:25 AM**

**Union Square 24**

**Indignity at Work: The Dark Side of Organizational Life**

Lilia M. Cortina, University of Michigan, Ann Arbor  
(Industrial/Organizational)

### Invited Talk

**10:00 AM - 10:25 AM**

**Union Square 24**

**Menstrual Cycles and Mate Preferences: A Meta-Analytic Investigation of Research Artifacts**

Wendy Wood, University of Southern California  
(General)

### Invited Talk

**10:00 AM - 10:25 AM**

**Yosemite Room B**

**Psychoinformatics: New Horizons at the Interface of the Psychological and Computing Sciences**

Tal Yarkoni, The University of Texas at Austin  
(Methodology)

### Invited Symposium

**10:00 AM – 11:20 AM**

**Golden Gate 4-5**

**Certainty and the Self**

Robert A. Burton, M.D.  

### Invited Symposium

**10:00 AM – 11:20 AM**

**Golden Gate 4-5**

**Intervention Science**

Chair: Geoffrey L. Cohen, Stanford University  
(Social)

**Presentations:**

- **Carol S. Dweck,** Stanford University  
- **Kevin N. Ochsner,** Columbia University

### Poster Session IX

**10:00 AM - 11:00 AM**

**APS Exhibit Hall - Grand Ballroom**  
(Setup 9:45 AM - 10:00 AM)
Invited Symposium
10:00 AM - 11:20 AM
Golden Gate 7

Race and Parenting in African Americans: An Examination of Gender and Context
Chair: Michael Cunningham, Tulane University
(Developmental)

Presentations:
Davido Dupree, University of Pennsylvania and Community College of Philadelphia
Shauna M. Cooper, University of South Carolina
Tirzah R. Spencer, Nemours Health and Prevention Services
Margaret B. Spencer, University of Chicago

Discussant: Michael Cunningham, Tulane University

Invited Talk
10:30 AM - 10:55 AM
Union Square 15-16
What Can the Field of Judgment and Decision Making Learn from The Psychology of Work Performance?
Scott E. Highhouse, Bowling Green State University
(Industrial/Organizational)

Invited Talk
10:30 AM - 10:55 AM
Union Square 23
Wontpower: A Computational Account of Mental Effort
Robert O. Kurzban, University of Pennsylvania
(General)

Invited Talk
10:30 AM - 10:55 AM
Yosemite Room B
Pattern Recognition and Clinical Neuroimaging: Potential and Caveats
Janaina Mourao-Miranda, University College London, United Kingdom
(Methodology)

Invited Address
10:30 AM - 11:20 AM
Yosemite Room A
How Psychological Modeling Can Benefit From Bayesian Methods
Michael D. Lee, University of California, Irvine
(Cognitive)

For posters and full program details, use the convention app "2014 APS Convention" or visit www.psychologicalscience.org/convention.
This broadly based international Journal sits at the interface of clinical psychological science and other disciplines, publishing the best papers from the full spectrum of relevant science. The Journal welcomes empirical papers as well as occasional reviews and associated theoretical formulations.

**Call for Papers**

We are interested in individual articles as well as series of articles on novel and emerging topics in clinical psychological science. Examples of special interest include:

- Chronic disease and mental health
- Computational psychiatry
- Genetics and epigenetics
- Transdiagnosis and transtreatments
- Microbiome and connectome and psychopathology
- Psychoneuroimmunology
- Diet and micronutrients

While each of these specific topics is of keen interest, as a group, they also convey the special thrust of the Journal. We are interested in the forefront of science and in taking advantage of multiple advances in theory, assessment, and technology that can inform our core domains and bring together multiple approaches and disciplines. The Journal welcomes suggestions for articles and series topics in keeping with this overall thrust.

For Aims and Scope and submission guidelines, go to [www.psychologicalscience.org/cps](http://www.psychologicalscience.org/cps)
Invited Symposium
10:30 AM - 11:50 AM  Continental Ballroom 7-8

Social Power and the Person-Situation Interaction: Incorporating Person and Situational Influences to the Study of the Antecedents and Consequences of Power
Chair: Serena Chen, University of California, Berkeley
(Personality/Emotion)

Presentations:
Dana R. Carney, University of California, Berkeley
Ana Guinote, University College London, United Kingdom
Adam D. Galinsky, Columbia University

Invited Talk
11:00 AM - 11:25 AM  Union Square 15-16

Turning Self-Regulation Theory Into a Paradigm for Psychology
Jeffrey B. Vancouver, Ohio University
(Industrial/Organizational)

Invited Talk
11:00 AM - 11:25 AM  Union Square 23

Do Women’s Mate Preferences Change Across the Ovulatory Cycle? Meta-Analysis and p Curves Support Genuine and Robust Effects
Martie G. Haselton, University of California, Los Angeles
Co-Author: Kelly Gildersleeve, University of California, Los Angeles
(General)

Invited Address
11:30 AM - 12:20 PM  Golden Gate 2-3

Beyond Localization: Detailed Mapping of Cognitive Representations Across the Human Brain
Jack L. Gallant, University of California, Berkeley
(Biological/Neuroscience)

Society for the Teaching of Psychology
11:00 AM - 11:50 AM  Franciscan Room C

Teaching Contentious Classics: Harlow, Sherif, and Milgram Revisited
Carol A. Tavris, Social Psychologist and Writer
(General)

Program Kiosks
Electronic Convention program kiosks are located by the APS Registration Desk, Exhibit Hall, and Golden Gate meeting area.

For posters and full program details, use the convention app "2014 APS Convention" or visit www.psychologicalscience.org/convention.

**Come Meet Us!**  
1:30 PM - 2:00 PM  
APS Exhibit Hall - Events Area

Meet the Exhibitor: JMP/SAS  
For nearly 25 years JMP statistical discovery software from SAS has been the tool of choice for researchers, scientists, and other data explorers and analysts. JMP links comprehensive statistics with dynamic graphics on the Mac and PC desktop. With its intuitive point-and-click interface JMP empowers you to understand more from your data in less time; whether it's a t-test or mixed-effects model, JMP can help you spend less time analyzing and more time discovering.

Cross-Cutting Theme Program

Changing Neurobiology With Behavior

1:00 PM - 3:45 PM

Psychological science often starts with the premise that our neurobiological milieu shapes and influences our behavioral responses. This cross-cutting theme program reverses those causal arrows to explore how behavior—from life experiences to cognitive training to mindfulness attention—can modify underlying biological structure, thus highlighting the bidirectional nature of experiences and biology.

1:00 PM - 1:35 PM

**Rat Tales Demonstrating That ‘LIFE’, as an Independent Variable, Influences Neurobiology**

**Darlene D. Francis, University of California, Berkeley**

Much like the description of this symposium, many of us were implicitly taught to believe that biological/genetic vulnerabilities influence behavior. The directionality of this function matters. Using examples from our rodent models, we will demonstrate that life experiences (BEHAVIOR) can directly influence neurobiological processes to influence outcomes, particularly stress-sensitive markers.

1:40 PM - 2:15 PM

**Behavioral Neurostimulation: Creating Neural Contexts for Adaptive Memory**

**R. Alison Adcock, Duke University**

Motivation moves us through the world, making models of it as we go. New research shows how motivated states alter brain responses to new and unexpected information and bias the contents of memory. How might these biases contribute to mental health vulnerabilities? How might we leverage greater understanding of motivated states to develop new interventions?

2:30 PM - 3:05 PM

**Action Video Games as Exemplary Learning Tools**

**Daphne Bavelier, University of Geneva, Switzerland**

New media use is often perceived as debilitating; yet, the oft-decried activity of playing action-packed, fast-paced video games has been found to have surprisingly positive impact on a broad range of skills. A training regimen whose benefits are so broad is unprecedented and provides a unique opportunity to identify factors that underlie generalization of learning and principles of brain plasticity.

3:10 PM - 3:45 PM

**Emotional and Cognitive Mechanisms in the Treatment of Mood and Anxiety Disorders: From Psychotherapy to Brain Training**

**Amit Etkin, Stanford University**

Mood and anxiety disorders are characterized by exaggerated emotional reactivity, impoverished executive control, and poor emotion regulation. I will report on two avenues for understanding and remediating these deficits: an established psychotherapeutic intervention, and an emerging approach for remediation of emotion regulation through an internet-delivered “brain training” neuroplasticity-based neurobehavioral intervention.

---

**Play It To Win It**

Play the Scavenger Hunt in the APS Exhibit Hall Friday and Saturday.

Visit the APS Booth (#500) for your game card.

Champions:
Carol S. Dweck, Stanford University
Paul Ekman, Paul Ekman Group, LLC
R. Eric Landrum, Boise State University
Nora S. Newcombe, Temple University
Keith Rayner, University of California, San Diego
Daniel L. Schacter, Harvard University
Claude M. Steele, University of California, Berkeley

Women in Cognitive Science
3:00 PM - 4:50 PM  Powell Room A-B

Intellectual Phony or Successful Academic?
Overcoming the Impostor Syndrome
Chair: Janet van Hell, The Pennsylvania State University
Chair: Natasha Tokowicz, University of Pittsburgh
(Cognitive, General)

Presentations:
Valerie Young, Author
Lauren Aguilar, Stanford University
Jyotsna Vaid, Texas A&M University

Invited Symposium
4:00 PM - 5:20 PM  Franciscan Room B

Towards an Integrative Science of Gratitude
Chair: Dacher Keltner, University of California, Berkeley
(General)

Presentations:
Malini Suchak, Canisius College
Christina C. Karns, University of Oregon
Sara B. Algoe, University of North Carolina at Chapel Hill
Robert A. Emmons, University of California, Davis

Invited Symposium
4:00 PM - 5:20 PM  Yosemite Room A

Cognitive Models in Neuroscience
Chair: Gordon D. Logan, Vanderbilt University
(Cognitive)

Presentations:
Wei Ji Ma, New York University
Robert M. Nosofsky, Indiana University

Coffee Break
5:30 PM - 6:00 PM  East Lounge

Poster Check

Storage for your poster while attending the APS Convention.

Located on the Grand Ballroom Level of the San Francisco Hilton Union Square, outside of the APS Exhibit Hall.

Friday, May 23 – 8:00 AM - 5:30 PM
Saturday, May 24 – 8:00 AM - 5:30 PM
Sunday, May 25 – 8:00 AM - 2:00 PM
Bring the Family Address

6:00 PM – 7:00 PM
Continental Ballroom 4-6

Make It Stick: How Memory Athletes Perform and How Their Techniques Can Help You

Henry L. Roediger, III, Washington University in St. Louis

Nelson Dellis, Memory Athlete, Climb for Memory

How can a person memorize a deck of cards in less than 22 seconds? Or remember 364 digits in order after hearing them once (the classic digit span task)? Or memorize 300 random words in order in 15 minutes? This presentation will come in two parts. Roddy Roediger will speak on how psychologists have approached the topic of mnemonic techniques and present examples of how these techniques are misunderstood and underutilized. He will also discuss results from his collaborative studies of memory athletes, both on memory tasks and on other cognitive tasks requiring focused attention. Nelson Dellis, the 2014 U.S. Memory Champion, will discuss his person-action-object system for memorizing and will demonstrate how it works. He will provide insight into the world of memory athletes and their remarkable performances that produced the records cited above.

Henry L. Roediger III and co-author Peter C. Brown will sign copies of their book, Make It Stick: The Science of Successful Learning, immediately following the Bring the Family Address.

Saturday Night Reception

7:00 PM - 8:30 PM
East Lounge

The APS Saturday Night Reception is a wonderful opportunity to renew acquaintances and network with colleagues. Light hors d'oeuvres will be served.

The Convention Continues ...

Relive some of the memorable moments of the 26th APS Annual Convention.

Find encore performances of these leaders in psychological science on the APS website.

APSA Wikipedia Initiative
Harnessing Wikipedia for Psychological Science

Join the more than 3,300 psychological scientists
who are taking part in the initiative to improve
public understanding of our field.

- **Classroom Writing Assignments:** under the
  supervision of their professors, students are using
  Wikipedia entries as course writing assignments.
  The APSWI portal helps set up a class, makes
  assignments, tracks individual student
  contributions, and supports peer review.

- **Volunteer Editors:** APS members are updating
  and editing articles on psychological science for
  accuracy and completeness.

- **Volunteer Raters:** APS members are rating
  Wikipedia article quality.
