## APS-SMEP Methodological Workshop
### ERP Analyses: Simple Tips to Significantly Up Your Game
**Guillaume A. Rousselet**, University of Glasgow, United Kingdom

This workshop is cosponsored by the Association for Psychological Science (APS) and the Society of Multivariate Experimental Psychology (SMEP). Separate registration is required for workshops, which are open to Convention and/or Teaching Institute registrants only. To register, go to APS Registration on the Lobby Level.

### Introduction to Structural Equation Modeling
**Gregory R. Hancock**, University of Maryland

This workshop is cosponsored by the Association for Psychological Science (APS) and the Society of Multivariate Experimental Psychology (SMEP). Separate registration is required for workshops, which are open to Convention and/or Teaching Institute registrants only. To register, go to APS Registration on the Lobby Level.

### Multilevel Modeling
**Elizabeth Page-Gould**, University of Toronto, Scarborough, Canada

This workshop is cosponsored by the Association for Psychological Science (APS) and the Society of Multivariate Experimental Psychology (SMEP). Separate registration is required for workshops, which are open to Convention and/or Teaching Institute registrants only. To register, go to APS Registration on the Lobby Level.

Fifty years of split-brain studies have led me to a long-term view on how to best understand mind/brain interactions. Overall, the view is consistent with the idea that complex neural systems, like all complex information processing systems, are highly modular. At the same time, how the modules come to interact and produce unitary goals is the great unknown. In this process, the importance of self-cueing cannot be overestimated. It is demonstrably evident in the human neurologic patient and especially in patients with hemispheric disconnection. When viewed in the context of modularity, it may provide insights into how a highly parallel and distributed brain coordinates its activities to produce a unitary output. Gaining a full understanding of cueing mechanisms will require shifting gears away from standard linear models and adopting a more controlled and dynamical system view of brain function.

Gazzaniga will sign copies of his books immediately following his Keynote Address.

APSSC Convention Kickoff and Student Social
The APS Student Caucus welcomes student affiliates and provides information about all of the great student events at the convention. Students will be able to relax in a casual environment and meet other students who share the same interests. The event is at Uptown Tap House, located 3412 Connecticut Avenue, NW.

Please remember to bring ID, as well as your APS Convention Badge. District law requires that you must be at least 21 years old to enter the establishment.

Directions: The Uptown Tap House is a short walk (.7 miles) north on Connecticut Ave NW. The Cleveland Park Metro station is one block from the Uptown Tap House (take the Metro next to the Marriott Wardman Park Hotel in the direction of Shady Grove).

For posters and full program details, use the convention app “APS2013” or visit www.psychologicalscience.org/convention.
