DOES HIGH SELF-ESTEEM CAUSE BETTER PERFORMANCE, INTERPERSONAL SUCCESS, HAPPINESS, OR HEALTHIER LIFESTYLES?

Roy F. Baumeister, Jennifer D. Campbell, Joachim I. Krueger, and Kathleen D. Vohs

1Florida State University; 2University of British Columbia, Vancouver, British Columbia, Canada; 3Brown University; and 4University of Utah

Project Editor: Lewis Lipsitt

About the Authors

Roy F. Baumeister received his Ph.D. in psychology from Princeton University in 1978. He served as professor of psychology at Case Western Reserve University from 1979 to 2003, and in 2003 he became the Eppes Professor of Psychology at Florida State University. He has also worked at the University of California at Berkeley, University of Texas at Austin, University of Virginia, Max-Planck-Institute, and Center for Advanced Study in the Behavioral Sciences. He has more than 250 publications spanning multiple topics, including self and identity, interpersonal rejection, performance under pressure, sex, aggression, human nature, and meaning.

Jennifer D. Campbell received her Ph.D. in psychology from the University of Georgia in 1982. She is currently a professor of psychology at the University of British Columbia, a position she has held since 1982. She has numerous publications on topics relevant to self-esteem, including articles on self-evaluation maintenance strategies, reactions to feedback, attributions, perceptions of self and others, self-concept clarity, persistence, accuracy of self-beliefs, social influence, and the structure of the self-concept.

Joachim I. Krueger is associate professor of psychology and human development at Brown University. He received his Ph.D. in psychology from the University of Oregon in 1988. A fellow of the American Psychological Society, he has published in the areas of self-perception, stereotyping, and life-span development. The study of the conditions under which human judgment is more or less rational or accurate is a theme underlying much of his research.

Kathleen D. Vohs received her Ph.D. in psychological and brain sciences from Dartmouth College in 2000. She is currently a research fellow working at the University of Utah, funded by the National Institute of Mental Health. Vohs’s research addresses basic processes related to self-esteem, self-regulation, and interpersonal functioning, as well as applications to personal spending, savings, and chronic dieting.
