

The Key To Raising Brilliant Kids? Play A Game

October 22, 2019

We all want to raise smart, successful kids, so it's tempting to play Mozart for our babies and run math drills for kindergartners. After all, we need to give them a head start while they're still little sponges, right?

“It doesn't quite work that way,” says Kathy Hirsh-Pasek, a professor of psychology at Temple University and co-author of [Becoming Brilliant: What Science Tells Us About Raising Successful Children](#) with Roberta Golinkoff. She's been studying childhood development for almost 40 years.

So how *does* it work? NPR Education reporters and *Life Kit* hosts Anya Kamenetz and Cory Turner talk with Hirsh-Pasek about the “six C's” that kids need to succeed — collaboration, communication, content, critical thinking, creative innovation and confidence — and why raising brilliant kids starts with redefining brilliant.
