

## Much More Online

February 28, 2022

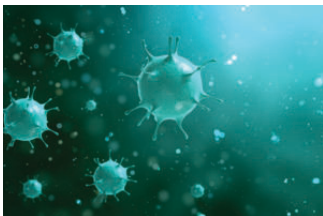

### [APS Global Collaboration on COVID-19](#)

This important initiative convenes psychological scientists and other behavioral science experts to assess how the field has contributed to combating the COVID-19 pandemic and identify gaps in understanding for new research to address.

### [Self-Control and Habit Formation](#)

There's extensive research in APS journals, including “Increasing Vaccination: Putting Psychological Science Into Action” and “Beyond Willpower: Strategies for Reducing Failures of Self-Control” (*Psychological Science in the Public Interest*).

### [Research Topic: Epidemics and Public Health Behavior](#)

APS's partnership with Wiki Education has improved Wikipedia's coverage of psychological science in thousands of articles. Learn how you can [contribute to this work](#).

### [Members in the Media](#)

View media coverage of our members' research and to learn more about how they are sharing psychological science with the public.

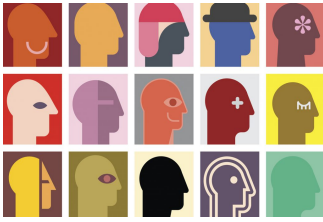

### [Talks by Students and Early-Career Researchers](#)

The *Observer* features previews of research by up-and-coming voices related to the major themes of the day, including combating stereotypes and bias.

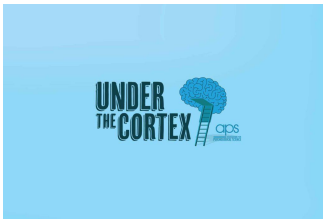

### [Research Topic: Goals and Motivation](#)

Articles in this collection explore the science involved in topics including self-control, student engagement, athletic performance, money management, and much more.

### [Podcasts: \*Current Directions in Psychological Science\*](#)

Journal editor Robert Goldstone invites researchers to dive deeper into the compelling insights behind their recently published research.

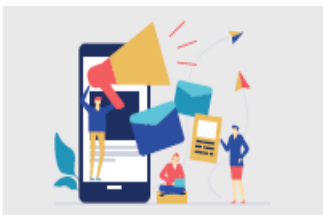

### [Podcasts: New Episodes of \*Under the Cortex\*](#)

APS's weekly podcast: the grieving brain, the importance of play during childhood, the impact of online "ghosting," the problems with eyewitness identification procedures, and much more.

### [Science Communication](#)

Whether you want to confront conspiracy theories, get your science in the media, or simply reach more followers on social networking platforms, you'll find a growing list of battle-tested insights and tips in the Communicating Psychological Science column.

### [More Member News](#)
