

## **2-week Summer School in Nonlinear Dynamics in Life Sciences**

March 21, 2018

Applications to Neuroscience and Psychology June 18-29, 2018; hosted at McGill University, Montreal, QC, Canada

We are pleased to announce a 2-week summer school in theory and applications of nonlinear dynamics in neuroscience and psychology. The program includes tutorials by experts in nonlinear dynamics, computer lab applications, and trainee presentations. Travel funds are available; housing and food costs are included.

The full program, application, and financial support are available

at [www.medicine.mcgill.ca/physio/khadralab/public\\_html/summer.html](http://www.medicine.mcgill.ca/physio/khadralab/public_html/summer.html)

Sponsors include the William K Estes fund (Association for Psychological Science and the Psychonomic Society); the Association for Psychological Science; CAMBAM (McGill) and CREATE ([cd-create.org](http://cd-create.org)) local networks in nonlinear dynamics.
